

IOSH Fire Safety for Managers.

Duration: One day.

Course overview:

Developed in collaboration with world-renowned experts, IOSH has created the *Fire Safety for Managers* course.

The one-day course is designed to help managers and business owners take the lead in establishing an effective fire safety culture in their business. It uses applied learning, allowing small groups to work through relevant case studies to gain a full understanding of fire risks and how best to manage them.

Learning aims:

Fire Safety for Managers is designed for managers and supervisors in any sector and any type of organisation worldwide. Managers who take this one-day course will be brought up to date with all the practical actions they must take to prevent and deal with fire risks.

While they won't suddenly become experts, they will gain the knowledge and confidence to let them take responsibility for fire safety. Managers who complete this course will gain self-assurance and skills to put in place precautions and lead their staff safely in fire incidents.

Course content:

IOSH Fire Safety for Managers introduces candidates to:

- employers responsibilities.
- fire and fire safety measures.
- assessing fire risks.
- creating a fire safety culture.

Employers can expect to see an improved organisation-wide fire safety awareness culture and appreciation of fire safety measures, active staff involvement to improve the workplace and reduce risks and an enhanced reputation within your supply chain.
